## PRESS RELEASE

---

### **2023 – the year of long-term anniversaries: Once again honor for 25 years employment with the company Braunform GmbH**

Evelyn Kreuzer is a long-standing employee who has actively experienced and helped shape the technical development of the company. As an experienced technical draughtswoman, she is proficient in various CAD systems and is always up to date with the latest innovations. She is not only responsible for creating and checking design drawings and parts lists, but also ensures the quality of the drawings required for production. She creates user manuals and tool data for customers for all orders, whether new or old. She is the person to contact when searching for information on past orders that are stored on microfilm, in the archive or on old drives, for example. This is a great advantage for customers who need information about tools that were manufactured decades ago. "Only with continuity, creativity and a lot of heart can you keep reinventing yourself over the years," says Pamela Braun, owner and managing director.

Braunform GmbH is a typical example of the success story of many companies in Baden. Over the course of its history, the medium-sized company has developed from a craft business into a high-tech company in the field of mould making and plastics technology with an international outlook. With a modern training centre, experienced trainers, cross-departmental projects and training tailored to each individual personality, Braunform offers an ideal framework for the start of a career. Internal further training programmes also play an important role after the apprenticeship.

#### **PERSONAL DATA:**

Date of joining: 01.10.1998

Residence: Bahlingen

Occupation: Since beginning in construction as a technical product designer

From left to right: Erich Braun (Founder of the Company), the jubilarian Evelyn Kreuzer and managing director Joachim Stiller

## **Braunform at a glance**

Braunform GmbH, founded in 1977 by Erich Braun in Bahlingen a. K., today is one of the world's leading partners in the field of plastic mold making. The long-term oriented family business has made it its goal to produce injection molds for whose end products - according to today's standards - plastic as a raw material is without alternative or more resource-saving than the possible alternative. The unique selling point of the mold-shop is the pharmaceutical production in own clean rooms according to GMP C and D. Today, Braunform GmbH is managed by Mrs. Pamela Braun (Managing Partner), Mr. Emmanuel Foyer (General Manager) and Mr. Joachim Stiller (General Manager). With 365 employees, the company is considered to be an important employer in the region in the southwest of Germany.

## **Mission Statement**

Molding Your Visions: We mold the needs of our customers. We provide solutions to effectively produce our customers' products using clean, state-of-the-art technology with core competencies in mold making, injection molding and full service.

## **Braunform in Detail**

Braunform specializes in the production of multi-component molds, multi-cavity molds, stack molds, molds for medical technology (MED Mold®) as well as fast, long-lasting rotary tables. The fully air-conditioned precision mold shop with state-of-the-art production technology serves – amongst others – industries like pharmaceutical, personal care, water technology, electrical and automotive. For the pharmaceutical industry, sophisticated manufacturing processes, including automated assembly and stamping, are implemented in state-of-the-art clean rooms in accordance with GMP C and D. In our own technology center, injection molding machines for 2K (with silicone gating) and 3K applications can be used for pre-series production. Due to project management and full-service engineering, shortest time-to-market times are made possible and costs are significantly reduced. Key elements are process reliability, shorter cycle times, increased output and highest product quality in combination with support and consulting for sustainable production processes. The company is certified according to DIN EN 13485 / 15378 / 9001 / 14001 / 50001.

The company is fully committed to "Engineering Made in Germany". This includes not only a highly qualified, enthusiastic team and a high proportion of apprentices (10%), but also highest quality and technological leadership. The declaration of sustainability, which is firmly anchored in the company's policy, commits the company to constantly improving its own CO2 footprint. In 2020, the company was also awarded a silver medal by the sustainability platform "Ecovadis". Both company health care and social commitment are given high priority. As one of the best employers in Germany, Braunform received the "Top Job" award for the third time in 2020, following 2014 and 2017.
