

PRESS RELEASE

Braunform welcomes 13 new talents into the future: combining theory and practice

Braunform, an industrial solutions provider and strategic partner in the field of injection molding, is pleased to welcome 12 new apprentices and one dual student this year, who are beginning their careers at Braunform. The junior staff will be trained in the professions of tool mechanic, metal technology specialist, mechatronics technician, industrial clerk, plastics & rubber technologist, logistics specialist, and in the Bachelor of Engineering program with a focus on mechanical engineering.

It is a great pleasure that many talented young people have once again chosen to pursue their training at Braunform this year. This underscores Braunform's role as a particularly attractive employer in the region. For many years, training has been of great importance at Braunform, as evidenced by the training rate of over 10%. Currently, the company supervises around 40 apprentices and students and relies on a proven training concept: from the very beginning, experienced trainers and mentors are on hand to provide individual support and guidance throughout the training. Braunform is already starting to recruit new apprentices for 2025 to ensure a continued supply of well-trained specialists in the future.

A modern training program directly integrated into the production process with the latest technology, as well as joint activities and events, are further essential components of the training concept. In addition to the annual apprentice excursion, international internships are among the impressive experiences that Braunform offers its apprentices. This year, the apprentice excursion took all apprentices to white-water rafting, followed by a visit to the company Meusburger GmbH in Wolfurt, Austria. These exciting and educational activities not only fostered team spirit but also provided valuable practical insights and opportunities for the apprentices to get to know each other better.

New apprentices at Braunform

Braunform at a glance

Braunform GmbH, founded in 1977 by Erich Braun in Bahlingen a. K., today is one of the world's leading partners in the field of plastic mold making. The long-term oriented family business has made it its goal to produce injection molds for whose end products - according to today's standards - plastic as a raw material is without alternative or more resource-saving than the possible alternative. The unique selling point of the mold-shop is the pharmaceutical production in own clean rooms according to GMP C and D. Today, Braunform GmbH is managed by Mrs. Pamela Braun (Managing Partner), Mr. Emmanuel Foyer (General Manager) and Mr. Joachim Stiller (General Manager). With 380 employees, the company is considered to be an important employer in the region in the southwest of Germany.

Mission Statement

Molding Your Visions: We mold the needs of our customers. We provide solutions to effectively produce our customers' products using clean, state-of-the-art technology with core competencies in mold making, injection molding and full service.

Braunform in Detail

Braunform specializes in the production of multi-component molds, multi-cavity molds, stack molds, molds for medical technology (MED Mold®) as well as fast, long-lasting rotary tables. The fully air-conditioned precision mold shop with state-of-the-art production technology serves – amongst others – industries like pharmaceutical, personal care, water technology, electrical and automotive. For the pharmaceutical industry, sophisticated manufacturing processes, including automated assembly and stamping, are implemented in state-of-the-art clean rooms in accordance with GMP C and D. In our own technology center, injection molding machines for 2K (with silicone gating) and 3K applications can be used for pre-series production. Due to project management and full-service engineering, shortest time-to-market times are made possible and costs are significantly reduced. Key elements are process reliability, shorter cycle times, increased output and highest product quality in combination with

support and consulting for sustainable production processes. The company is certified according to DIN EN 13485 / 15378 / 9001 / 14001 / 50001.

The company is fully committed to "Engineering Made in Germany". This includes not only a highly qualified, enthusiastic team and a high proportion of apprentices (10%), but also highest quality and technological leadership. The declaration of sustainability, which is firmly anchored in the company's policy, commits the company to constantly improving its own CO2 footprint. In 2020, the company was also awarded a silver medal by the sustainability platform "Ecovadis". Both company health care and social commitment are given high priority. As one of the best employers in Germany, Braunform received the "Top Job" award for the third time in 2020, following 2014 and 2017.
